CERTIFICATIONS

- Mern Stack Intern Certification from BlackBucks.
- VLSI Intern Certification from IIDT in partnership with BlackBuck Engineers.

INTERESTS

- Technical: UI/UX Design | Selenium Automation using Java | App Development
- Non-Technical: Cooking | Cricket | Watching Movies

ACHIEVEMENTS

- Certificate of Merit for getting above 8 CGPA in 1st and 2nd years.

SUMMARY

Electronics and Communication Engineering (ECE) student with working knowledge in Python, MERN Stack, and Front-End development. Gained experience by building 2+ MERN projects and working on IoT-based mini projects. Eager to learn, grow, and contribute to real-world projects while collaborating with industry professionals.

EXPERIENCE

Co-Host, Co-Organizer | GIST | Dec 2021-Present

- Co-hosted and organized college events and fests, boosting student participation through effective planning and engagement strategies.
- Together with seniors, I co-hosted the "Electronics Club" to provide offline mentoring and hands-on teaching to juniors on various aspects of electronics.

SKILLS

Technical: Python, HTML, CSS, MERN Stack, MySQL, Java, JavaScript, Prompt Engineering

Tools: VS Code, Github, Eclipse, Canva, Vercel, Render

Soft Skills: Communication, Leadership, Time Management, Adaptability, Teamwork and Collaboration.

PROJECTS

Local Sphere | Github Link: [LocalSphere](#) | Live Web: [LocalSphere](#)

Used : MERN Stack | HTML | CSS

- Contributed to the front-end development of a platform connecting local businesses, allowing them to register, advertise, and share their stories by writing blogs. Helps users to discover nearby services.

Event Management Application | Github: [EventManagement](#)

Used: MERN Stack | HTML | CSS

- Developed a dynamic web application for managing events, allowing users to add, edit, delete, and view events.
- Implemented features such as event reminders and a responsive interface to improve user experience

Smart Parking System | Used: Arduino Uno | Embedded C | Sensors

- Implemented real-time parking management using Arduino and sensors for efficient space allocation.
